

The Career Development Center's More effective outreach to Graduate students

A new graduate assistant (Moon-Sook Son, a master student in Communication) recently joined the University Career Development Center to develop programs to expand the University Career Development Center services intentionally and specifically to graduate students in the Colleges of Education, Agricultural, Food & Life Sciences, Engineering, Arts & Sciences.

Moon-Sook Son will vigorously attempt to manage current systems of communication between the University Career Development Center staff, faculty members, teaching assistants, graduate program directors, and graduate students to modify systems as needed to increase effectiveness.

Improving Resources will include:

- More frequent Grad Newsletter
- Develop communication system to better acknowledge specific needs of graduate students on campus and help graduate students fully utilize the Career Center services
- New 'Graduate Student section' separately from undergraduate student on the Career Center webpage
- Provide specified resources for potential career paths of graduate students including both academic career and business professionals
