What are some of the most important aspects of deciding which job offer to accept?

Job satisfaction is a two-way street. The more you know what to expect, the better informed you will be to make this important decision.

1. Know each position. Ask questions if you have them.
2. Learn benefits packages.
3. Decide whether or not you are willing to relocate.
4. Do a market comparison of cost-of-living if relocating.
5. When you have accepted an offer, be sure to let other companies know you are "off the market".
