- Professionalism
- Teamwork
- Technology

What skills does this major develop?

- Logic and critical thinking
- Computer programming
- Problem solving
- Data analysis
- Mathematical modeling
- Ability to analyze complex problems
- Use of computational tools
- Abstract reasoning

What graduate programs do majors often go into?

- Math
- Business
- Physics
- Education
- Data Science
- Computer Science
- Medicine
- Biostatistics

What careers do majors often go into?

- Math Teacher/Math Educator
- Actuary
- Quantitative Analyst
- Business Consultant
- Data Visualization Engineer
- Audience Analytics Coordinator
- Insight Analyst
- Business Intelligence Analyst
- Data Analyst
- Product Specialist
- Mathematics Researcher
- Librarian
- Software Testing Analyst
- Project Manager
- Work in publishing, development, libraries, media, education, law, healthcare, higher education, nonprofits, or so many others.
- Write your own story!

How do I start to plan my career?

☐ Complete the SparkPath Challenge Card activity online and then discuss your results with a career coach or career peer mentor. Talk about why it is important to you, how it relates to you and your previous experiences.

☐ What organizations are working on it?

☐ Which of these organizations appeal to me? What role would I like to have with them?

☐ What are my skills and how will I use them to work on this challenge?

☐ What skills, knowledge and experience do I need to develop to contribute more to the challenge?

☐ What is my plan to learn these things? Who can I connect with at the UofA for help?
